

IDENTITY IS KEY

One platform to
safeguard your
business

Oribi

Complete solutions for complex challenges

HENK DE KORT _ CEO ORIBI

Oribi presents itself as a completely new brand, built on the trusted foundations of ORIBI ID-Solutions, JanusID, Bouwpas, Certwell and SmartAIM. A brand that stands for connection, innovation and certainty. By merging our diverse product portfolios, we now offer one powerful platform focused on Identity, Compliance and Access. For our clients, this means a single integrated solution that answers the questions: "Who are you?", "What can you do?", and "What are you allowed to do?"

This rebranding enables us to strengthen our position in the Identity & Access Management market—not only in the Netherlands but also internationally. By combining our expertise and proven products under one brand, we offer a solid foundation: Oribi. This gives us greater impact and provides you, as a customer, with more clarity and convenience.

Organizations are increasingly seeking simple, integrated solutions for complex challenges. The shift from physical to digital identities is well underway. This demands advanced approaches with a strong focus on user-friendly and secure technologies. Oribi responds to these developments by offering innovative solutions that not only address today's challenges, but are also future-ready.

With Oribi, we provide clarity and strengthen our position as a trusted partner in Identity, Compliance, and Access.

By uniting all our solutions under one brand, we make it easier for you to understand who we are and what we offer. At Oribi, you'll find everything you need in a complete and integrated platform—a true one-stop shop.

We maintain a sharp focus on security. Whether it's managing construction sites, ensuring safety in healthcare facilities or controlling access at major infrastructure projects, Oribi provides comprehensive solutions tailored to your needs. We help you mitigate risks and safeguard the security of people, assets and

organizations. We do this by verifying identities, checking certificates for regulatory compliance and managing access to specific locations.

With Oribi, you get one trusted partner to support you in managing identities, ensuring regulatory compliance and controlling access. Our platform simplifies complex processes, saves time and enhances security, so you can focus on what truly matters.

Oribi delivers that connection. The 'O' in our name symbolizes a complete platform and endless possibilities. It reflects our vision to make complex challenges clear and manageable. Our name, Oribi, is no coincidence. Did you know it comes from the oribi, a species of antelope? This animal is known for its impressive jumping ability and graceful appearance. An alert creature that warns its kind of approaching danger and quickly adapts to new situations.

With Oribi, we are ready to be your partner in safety, efficiency, and innovation. We look forward to a renewed collaboration where we tackle new challenges and find solutions that truly make a difference for you.

Identity is key

Identity. Compliance. Access. Three key concepts that form the foundation of our approach and our commitment to security. We monitor with precision who enters where, with what identity and for what purpose.

Identity

WHO ARE YOU?

Safety starts with registering and identifying every person that your organization comes into contact with. Think, for example, about identifying visitors at a municipal office or verifying renters at a car rental agency. With broad applications in registration and identification, we monitor the identity of employees and visitors, manage profiles and data, and document everything that provides insight into the individuals we deal with. This helps prevent identity fraud, contributes to a safe work environment where risks are minimized, and ensures that the focus on safety is maintained.

Compliance

WHAT CAN YOU DO?

By ensuring compliance, we guarantee that individuals possess the appropriate qualifications and certifications to perform their tasks in accordance with laws and regulations. Our technology captures and verifies data digitally and accurately, ensuring that everyone is authorized to carry out specific tasks. This promotes safety and fairness, and ensures your organization complies with legal requirements. By mitigating risks, you create a reliable and secure workplace.

Access

WHAT ARE YOU ALLOWED TO DO?

Access focuses on authorization and managing access to locations and resources. Our solutions enable the assignment of rights and roles to individuals so that they only have access to the places that are relevant to them. Imagine a construction worker who only gets access to their assigned work area, or a healthcare worker with limited access to patient records. This protects your property and ensures the safety of everyone within your organization.

ORIBI ACADEMY

WHAT DO YOU KNOW?

Innovation never stops and at Oribi, we keep evolving. We continuously develop new features and integrate technologies that bring even more value to your organization. With every advancement in our field, our knowledge and expertise grow. The Oribi Academy offers high-quality training, workshops and insights that help your organization stay prepared for the challenges of tomorrow. This way, your organization remains not only secure but also up-to-date in an ever-changing world.

ONE PLATFORM

Innovative, safe and user-friendly

Oribi offers a single platform that supports companies in streamlining and securing their processes. Our innovative products make processes simpler, safer and more efficient—regardless of the sector or challenge.

Our platform is built as a complete ecosystem of services, products, tools and expertise, each tailored to practically every industry. We ensure precise identity verification, validate qualifications and certifications to guarantee a safe and fair work environment and comply with all laws and regulations. Additionally, we provide authorization and access management, so only the right people gain entry to the right locations.

FULL INTEGRATION

At Oribi, simplicity and efficiency are at the core. Our products are specifically designed to tackle complex challenges and optimize daily operations. Whether you work in construction, government, logistics, healthcare, automotive or any other sector – we have the solution that helps you work faster, safer and fully compliant.

Our advanced solutions integrate seamlessly with existing infrastructures, providing quick, secure and verified access. Thanks to smooth integration with current technologies, ease of use is maintained without compromising on security.

ORGANIZATION

Oribi is built on a solid foundation of specialists with deep expertise in Identity, Compliance and Access. Together we develop, innovate and implement solutions that seamlessly integrate with existing systems to ensure safety.

IDENTITY. COMPLIANCE. ACCESS.

Identity. Compliance. Access. Three key concepts that form the foundation of our approach and our commitment to security. We precisely monitor who enters, with what identity, and for what purpose. How do we do it? You'll find out in this brochure.

At Oribi, we keep a close eye on the safety of organizations and businesses. But safety is never a fixed concept. The constantly evolving challenges in identity and access management demand tailored solutions that offer practical answers, always fully compliant with laws and regulations.
